1 Executive Summary

1.1 The Quick Pitch

We install, maintain and service most brands and sizes of air conditioners, to keep the very hot summers and the very harsh winters comfortable. We advise you on the right sized unit for your environment to make sure of affordable running costs, and we advise our clients on the best use to make sure their units last longer. Many clients make a mistake of installing oversized or the wrong type of unit for their environment and our consultation services will get you started on the right track.

1.2 The Problem

Are you finding the seasons are becoming more and more unbearable? Due to the climate changes, we are experiencing, you are not alone. Do you already have an air conditioning unit that just does not seem to work like it used to or should? These are the problems experienced in most households and businesses.

1.3 The Solution

Our expertise can ensure these unbearable conditions are made bearable, and your old unit is in top working order alleviating the weather conditions. Good ventilation means the difference between a fresh open space feel in an environment, and that stale atmosphere in many establishments. Our team has the knowhow to give you optimal air flow in any space. We assist with energy saving consumption while delivering the best comfort. Our services clean your entire system ensuring that it is not redistributing harmful allergens and disease spreading bacteria. Our understanding of airflow dynamics in various environments enable us to advise you what system work best for any sized space.

2 Our Team & Organization

2.1 Mission Statement

To become one of the leading air conditioner suppliers by continually searching for the competitive advantage, creating brand awareness and concentrating on satisfying our customer's needs.

2.2 Management & Team

We work with a team of professionals who are committed to our vision.

2.3 Company Goals and Objectives

Our services are comprehensive including assisting clients with best practices for using their equipment optimally for longevity. You can call upon us to help you upgrade your current system or tune it up for peak performance.

In all that we do, our efforts are guided by these values:

- Service Excellence
- Reliability & Trustworthiness
- Responsibility & Accountability
- Technical Innovation
- Technological Leadership
- Social Responsibility & Investment

And of course, the complete and uncompromised satisfaction of you, the client.
